To: The Parents and Physician of _____
(child's name)

_____ is enrolling at Messiah Lutheran Preschool for the 2024-2025 school year. Due to the seriousness and changing nature of allergies we need to know that our facility is a safe place for this student.

Allergens and germs can easily be passed by close contact in the classroom. We cannot control what other children have eaten or touched prior to arriving at school each day. Craft projects at school sometimes use food items and ingredients. The snack list at Messiah Lutheran Preschool is designed to minimize exposure to common allergies such as nuts. I will review the snack list and let the Director know if there are any items on the list which the above-named child cannot eat.

Additionally, we are located in a multi-use facility and preschool classrooms are used by other groups. These groups may be in the building on any day of the week. We have no control over food and drink items that may be brought into these rooms. Contact and spills occur that we know nothing about.

We can make reasonable accommodations such as vacuuming daily, cleaning and sanitizing table surfaces daily, encouraging frequent hand-washing, and asking preschool families to help by not bringing allergy-containing products into the school.

We have no licensed medical personnel on staff. Our teachers meet childcare requirements for First Aid and CPR and are hired as educators.

I understand the use of the facility and the training of staff. I am comfortable having the above-named child attend Messiah Lutheran Preschool and release Messiah Lutheran Church and Preschool from medical liability.
